Art Unit: 1754

Continuation of 11. does NOT place the application in condition for allowance because: It is argued that claims 1-13, 16, and 19... (US 5,241,149). This is not persuasive because Applicant asserts that claim 1 is clearly novel while the Examiner's rejection is not based upon a lack of novelty and also because "creating a layer" is not considered by the Examiner to be "completely remote from" the "laminated layers" that Applicant appears to admit are disclosed in Watanabe. Rather, it would have been obvious to one of ordinary skill in the art at the time the invention was made to use a coated first layer of the iron chloride absorber in Watanabe because Watanabe discloses laminated layers of microwave-proof and packing material as preferable for safety and health (see column 7, lines 13-18), which would obviously, to one of ordinary skill, suggest the coating configuration of the disclosed iron chloride absorber on the disclosed iron powder main agent.

It is argued that claim 13, along with dependent... the iron powder. This is not persuasive for the reasons above.

It is argued that claim 14 stands rejected... Teumac et al. This is not persuasive because Teumac is not relied upon for Applicant's alleged shortcominbs of the Watanabe reference.

It is argued that in applicant's amendment of October 13... Watanabe et al. patent. This is not persuasive for reasons already of record.

Applicant is invited to contact the Examiner to arrange a personal interview if Applicant believes such an interview would be helpful.
